February 2014

Good News from Ex Protect & Heating!

Exe components (pushbuttons, contact blocks etc.) :

Our principals have received **Dust certification** for these components and we are busy adding this to our local IA certification so we will be able to build up **DUST (Ex t) certified control stations** as well as our now well known Exe control stations.

Further good news is that we should soon (by middle of next month) have a demo unit of the **Smart IS cell phone INNOVATION 2**. The unit now has **ANDROID** as **O/S** and has thereby increased its total functionality.

We look forward to receiving our demo unit and invite you to book a demo with us then to see what this phone is capable of.

Looking forward to hearing from you

The management team
